## Step 1—DIGITAL Personal Workstations

DIGITAL Personal Workstations are available through distribution partners. A list of eligible partners is available on DIGITAL Business Link or through a local DIGITAL Sales Office.

DIGITAL Personal Workstations may be ordered as:

- .. System Building Blocks are designed for “a la carte” ordering and distributor integration. System Building Blocks contain a system kernel, minimum of 64 MB memory (except for Intel i+ package), UltraSCSI integrated disk controller, 4.3 GB UltraSCSI hard disk drive (except for i+ Series UltraDMA system), and factory-installed Windows NT, DIGITAL UNIX or OpenVMS operating system.
- .. Packaged Systems are designed for ease of ordering and stocking. Packaged Systems contain a system kernel, a minimum of 64 MB memory (except for Intel i+ package), UltraSCSI integrated disk controller (except for Intel i+ package), 4.3 GB hard disk drive, graphics controller, and factory-installed Windows NT operating system.

DIGITAL Personal Workstations come standard with a three-year limited warranty. Year one features on-site service; years two and three are return to DIGITAL service, parts only. This warranty represents one of the most comprehensive in the industry.

### System Building Blocks

- .. Selection of a System and Country Kit from Steps 1 and 2 are mandatory
